

The Covid-19 virus has affected the way we operate in business, including waste.

**Futureproof your organisation and save money on long term waste costs with a Waste WOF (Warrant of Fitness).**

## WASTE WOF

### Why you need a Waste WOF:

- Your waste output will change as a result of the virus.
- The recycling industry will be hit hard and there will be less items accepted.
- Contaminated recycling will not be accepted due to H&S concerns.
- With fewer options for recycling, you will pay more for landfill.
- Landfill and transport fees will likely go up.
- The government landfill levies are set to rise to \$60 per tonne by 2023.

### Waste WOF includes:

- Online meetings.
- Virtual tour of premises (when lockdown lifted).
- Analysis of current waste infrastructure and costs.
- Overview of current waste system and signage.
- Liaison with waste company to ensure both your and their needs met.

## ABOUT US

### Our Daily Waste

Our Daily Waste has provided independent recycling and waste prevention services for organisations in Canterbury and beyond since 2012. We work with clients and their waste company to reduce waste and costs by providing practical solutions, including our customised recycling signage. Our clients include councils, schools, polytechnics, markets and marae.

Our Daily Waste has also provided waste services at more than 100 Canterbury events where we hand sort all waste for maximum diversion to recycling and organics streams. We have extended that service to businesses where we sort their recycling and divert any reusable items to charities, with one of our clients saving up to 28% in waste fees and supporting over 30 charities. Most importantly, they are showing staff and customers that they are committed to environmental stewardship.

It is this kind of hands-on commitment to waste prevention and diversion that can help you futureproof your organisation for these uncertain times.

To book your Waste WOF contact  
[sharon@ourdailywaste.co.nz](mailto:sharon@ourdailywaste.co.nz)

# Our Daily Waste can also provide:

- Customised recycling signage.
- Waste audits.
- Waste infrastructure and pricing assessments.
- Waste statistics and reports.
- Recycling sorting services.
- Litter removal services.
- Workshops and education.
- Procurement advice.
